

Part 6 : houses from 21 to 24

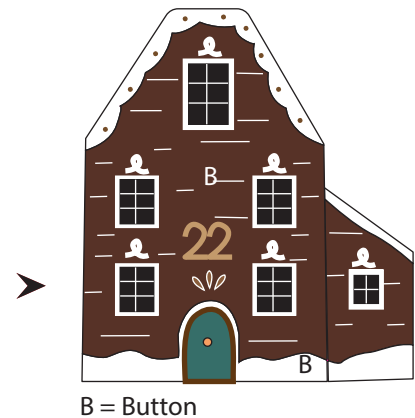

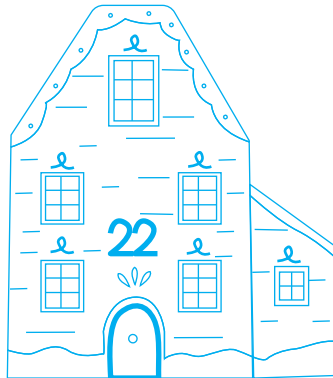

House 21 :

Paint the house. Allow to dry completely between painting operations. Add snow to the roof at the bottom of the house. Paint the windows and door, then the bars and frames of the windows and door. Draw lines to imitate wood on the walls of the house, as well as any decorations you like (heart at the top of the door and garland above the windows, house number and snowflakes). Add ribbons and sew a bead to the garland. Sew on the chosen buttons.

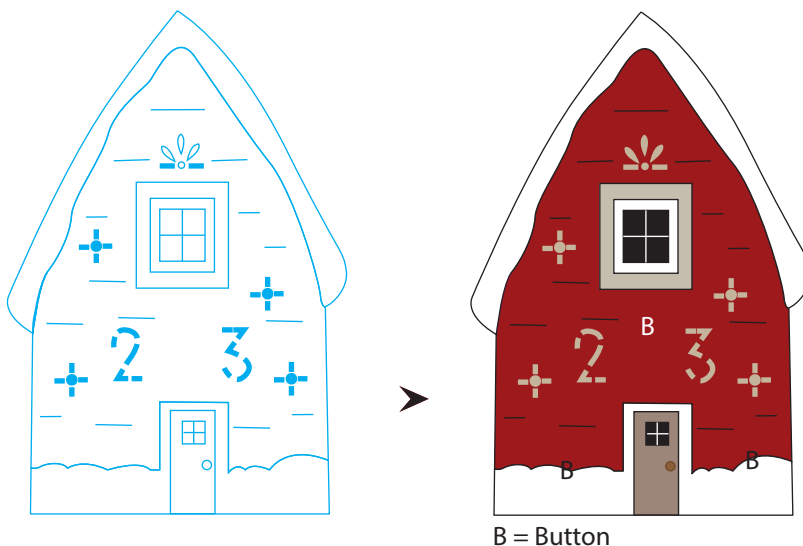

House 22 :

As before, paint the walls of the house. Paint the snow at the bottom of the house and on the roof, then the door, its frame and handle, and finally the windows, number and bars. Add a few lines to imitate wood, as well as a few decorations and snowflakes, then sew on the buttons. If you choose a wooden ball, secure it with linen thread so that it hangs below the top window.

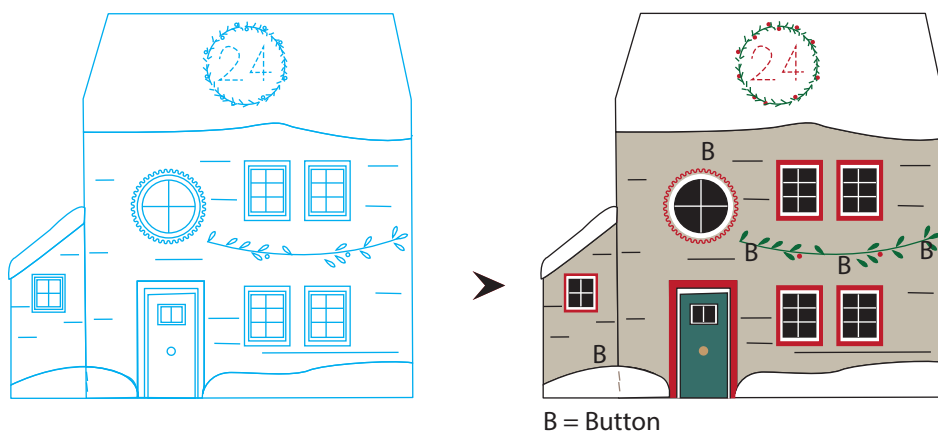

House 23 :

Paint the house according to the model, as above, the snow, the windows and the door. Paint the decorations on the facade. Paint the house number between the window and the door, leaving room for a button. Paint a few lines on the facade to represent boards and snowflakes. Sew on the chosen buttons.

House 24 :

All your houses are finished. Hang them on a Christmas garland or decorated fir branches; add ribbons, candy canes, gingerbread men and hearts and more if you like.

*Merry
Christmas !*
